HERO BOOKING INTERACTION MATRIX

The Smart Atelier Search & Filter Engine

Integrated seamlessly into the panoramic hero fold, the search bar acts as an intelligent concierge dispatch. Featuring frosted glassmorphism, instant auto-complete, dual-month calendar dates, and an advanced party configuration matrix.

FIELD 01

Destination Desk

Supports both published luxury circuits and unlisted custom requests.

- Real-time instant package auto-suggestions.
- Displays circuit titles, thumbnails, & duration.
- Bespoke custom lead capture for unlisted cities.

FIELD 02

Dual-Month Calendar

Two synchronized months displayed side-by-side with range highlights.

- Check-in to check-out range selection.
- Single-day or multi-week journey selection.
- Strict past-date validation & weekend tinting.

FIELD 03

Party & Cabin Class

Configurable party composition and transit classification.

- Adults (12+ yrs) counter.
- Children (2–12 yrs) & Infants counter.
- Economy, Premium, Business, First Class.

Out-of-the-Box Concierge Lead Routing Flow

When a traveler enters a destination outside published catalogs (e.g., *"Nashik"*, *"Coorg"*, *"Kaziranga"*), the search bar instantly adapts into a bespoke concierge inquiry trigger:

```
Desk Prompt: "We arrange custom private travel to “Nashik”. Connect with our desk to plan your itinerary."
CTA Action: [Request a call for detailed suggestions for Nashik] → Direct forward to VIP Operations Manifest.
```

Responsive Glassmorphic Ergonomics

On desktop, the search bar spans 768px with horizontal divisions and frosted blur (`backdrop-blur-2xl`). On mobile viewports (< 768px), it collapses gracefully into a stacked vertical thumb-friendly panel with zero horizontal overflow, preventing viewport clipping.

SPATIAL EXPLORATION INTERFACE
